

TD 13

Appeler un autre programme depuis Python

<https://docs.python.org/3/library/subprocess.html>

```
from subprocess import check_output

path = '.'
try:
    print(check_output(['ls', '-l', path]).decode("utf-8"))
except subprocess.CalledProcessError as e:
    print("Erreur pour ls -l "+path)
```

Option *shell=True/False* .

Sécurité / vérification des paramètres, cf.

<https://docs.python.org/3/library/subprocess.html#security-considerations> .
